

TILAK MAHARASHTRA VIDYAPEETH PUNE
INSTITUTE OF NURSING EDUCATION AND RESEARCH PUNE.

Name of the event – **World Pneumonia Day**
Organizer – Tilak Maharashtra Vidyapeeth Nursing Department
Date and Time – 12/11/2022 Time 11 am
Participants – S.Y.Basic B.Sc. Nursing Students
Speaker – Ms. Revti Chavan
Venue – Dhankawade Hospital UPH Center, Balaji Nagar, Pune.

Topic Addressed –

- Introduction about Pneumonia Day
- Definition of Pneumonia
- Etiological factors for Pneumonia.
- Prevention of Pneumonia.
- Management of Pneumonia.
- Role of Nurse in creating awareness regarding Pneumonia prevention and management.

THEME – ‘CHAMPIONING THE FIGHT TO STOP PNEUMONIA.’

World Pneumonia Day is dedicated to raising awareness about the disease named Pneumonia. It is observed every year on November 12. Pneumonia is a lung-based infection caused by bacteria, viruses, and fungi. The day marks an early diagnosis of the disease to seek the necessary steps to prevent the disease. Global events are organised to educate people about the causes and prevention of pneumonia.

WORLD PNEUMONIA DAY 2022: HISTORY AND SIGNIFICANCE

The day first came into effect on November 12, 2009, under the initiative named ‘Stop Pneumonia’. This was a global coalition against child pneumonia. Later, WHO and UNICEF introduced an integrated plan to prevent and control the disease globally. Covid-19 is another factor that caused severe damage to the lungs. The reason behind observing this day is to aim for zero deaths caused by pneumonia by 2030.

WORLD PNEUMONIA DAY 2022: SYMPTOMS AND TREATMENT

The symptoms of pneumonia range from mild to severe. That includes fever, cough, which may be dry, or produce a thick yellow, green, brown, or blood-stained mucus, difficulty in breathing, shivering, loss of appetite, lethargy, blood in the sputum, and chest pain.

The prevention of this disease is through maintaining hygiene, covering the mouth and nose with a mask, frequent washing of hands, and vaccines related to the flu.

Children living in areas with declining vaccination rates, rising malnutrition due to food shortages, and in homes that use polluting fuels for cooking and heating, are particularly vulnerable. UNICEF has predicted an explosion in child deaths if urgent action is not taken to reach these children, including with oxygen and antibiotics.

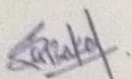

Older adults exposed to air pollution – most significantly from burning fossil fuels – and smoking are also at risk. Almost half of the estimated 1.6 million pneumonia deaths among adults aged over 50 are attributable to air pollution and smoking.

This World Pneumonia Day, on 12 November 2022, the Mériex Foundation and Every Breath Counts have awarded 11 civil society organizations small grants to support events that strengthen local engagement in the fight against pneumonia.

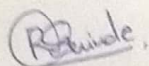

The session of day celebration was very interactive along with discussion regarding the topic and resolution of their related queries.

The students have presented the posters based on the theme.

At the end of the session, the effectiveness of the seminar was assessed through the question answers and evaluation of the posters.

TILAK MAHARASHTRA VIDYAPEETH, PUNE

Name of the event: Skill station on Assessment of preterm Baby

Organizer: Tilak Maharashtra Vidyapeeth

Venue: TMV, INER Pune

Date and time: 25/11/2022 at 3.00 pm-3.30 pm

Participants: Final Year. B. Sc. Nursing students

Speaker: Ms. Priyank Sable

Topic Addressed:

- Introduction to Assessment of preterm Baby
- Discuss purposes of preterm assessment
- To collect history
- to perform preterm APGAR score
- to do physical assessment
- to check the reflexes
- to identify need of baby and mother

Under the guidance of Dr. Madhuri Shelke (Principal, INER, Pune) and Subject In-charge Ms. Madhuri Kotkar conducted the skill station on Assessment of preterm Baby

At the beginning of the skill station, knowledge was assessed by asking various questions, then preterm assessment was explained. The goal of program was to improve the knowledge of the students related health assessment of preterm baby and identify need of baby and mother. The purpose of Assessment of preterm Baby are to know the congenital anomalies, reduce morbidity and mortality rate and to identify any risk factor in preterm. For the assessment first step is to collect history of mother during antenatal, labour and postnatal period, family history and any genetic disorders. After history collection APGAR score will be assess that score must be in between 7-10 which to determine respiratory distress. Physical assessment must be start head to foot examination with length and weight and the anthropometry measurement and the last step is to check reflexes of preterm baby tonic reflex, moro reflex, rooting etc. like reflexes has to assess which indicate preterm baby normality and abnormality. After the assessment can identify what are the need of baby and mother like need of baby are Adequate breast

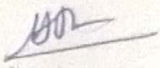

feeding - Protection from heat strokes - Prevention of infection in the ward - Maintenance of personal hygiene - Immunization - Growth monitoring, and need of mother are Adequate Nutrition - Postnatal exercises - Calcium Supplement - Family Planning - Adequate Rest

After the session, again questions were asked to the students to assess the effectiveness of Skill station.

The session was ended with vote of thanks by Ms. Priyanka Sable.

NAME OF THE EVENT – “Poster presentation and Health talk on occasion of World
Pancreatic Cancer Day 17 November 2022

ORGANIZER – Tilak Maharashtra Vidyapeeth, Nursing Department

DATE AND TIME – 29 November 2022 Time 2.00 pm

PARTICIPANTS – 4th year B. B. Sc. Nursing Student

VENUE – Noble Hospital, Pune.

THEME: It's about time, to know the symptoms .

World pancreatic cancer day is a day that unites the world's population in the fight against pancreatic cancer during Pancreatic Cancer Awareness Month. It aims to save millions of preventable deaths each year by raising awareness and education about the disease, pressing governments and individuals across the world to take action, with the ultimate goal of increasing the five-year survival rate of this deadly disease.

Currently, 8.2 million people die from cancer worldwide every year, out of which 4 million die prematurely (aged 30 to 69 years). There are around 496,000 new cases of pancreatic cancer each year and it is the 7th biggest cancer killer. However, so many people know nothing about it. But they can be forgiven for that because unfortunately, it barely gets attention.

CENTRAL OBJECTIVE:

World Pancreatic Cancer Day is the ideal opportunity to spread the word and raise the profile of cancer in people's minds and in the world's media.

THEME:

The theme for this year's World Pancreatic Cancer Day is “It's About Time”.

ACTIVITIES:

On the occasion of world Pancreatic Cancer Day Institute of Nursing Education and Research, Tilak Maharashtra Vidyapeeth, under the guidance of Prof. Dr. Madhuri Shelke (Principal, INER), and Dr. Perpetua Fernandes (HOD, MSN dept) Mr. Vaibhav Kamble (Clinical Instructor, INER, TMV) conducted the poster presentation and health talk on pancreatic cancer in Noble Hospital, Pune. Students participated in poster making and health talk very actively, they had displayed all posters in OPD of Noble Hospital, Pune, also they had given health education to the people in OPD of Noble Hospital, Pune on sign and symptoms of pancreatic cancer and preventive measures of pancreatic cancer.

TOPIC ADDRESSED:

Students of 4th year B. B. Sc. Nursing students participated through presenting posters. The posters depicted various aspects such as-

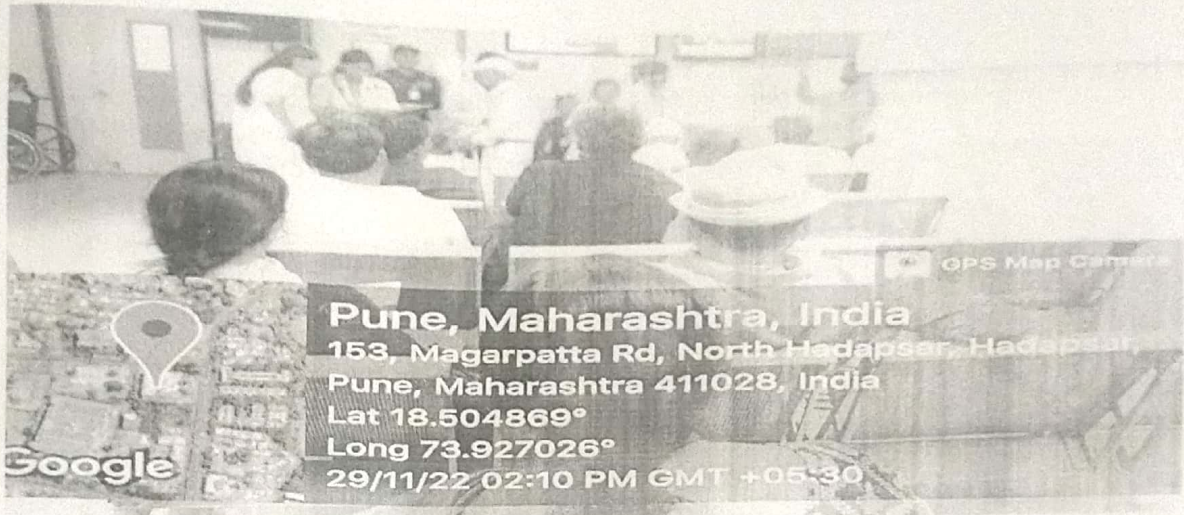

- Theme of World Pancreatic Cancer Day: "It's About Time".
- Risk factors for pancreatic cancer: Chronic inflammation of pancreas, Smoking, Diabetes etc.
- Sign and symptoms of Pancreatic Cancer: Mid back pain, Stomach pain, loss of appetite, unexplained weight loss etc.
- Prevention of Pancreatic Cancer: Maintain Healthy weight, quit smoking, if observed any sign take medical help.
- Actions for preventing Pancreatic Cancer.

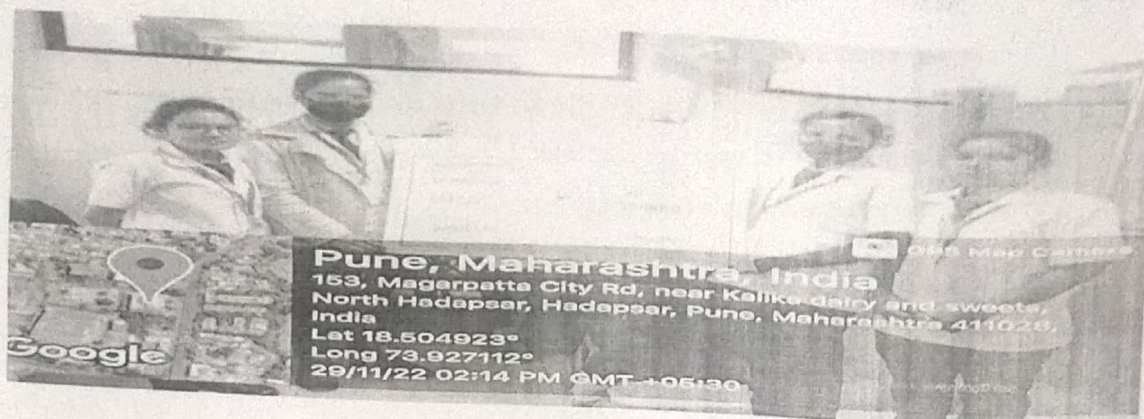

All the participated students have presented posters very creatively and in innovative manner.

CONCLUSION:

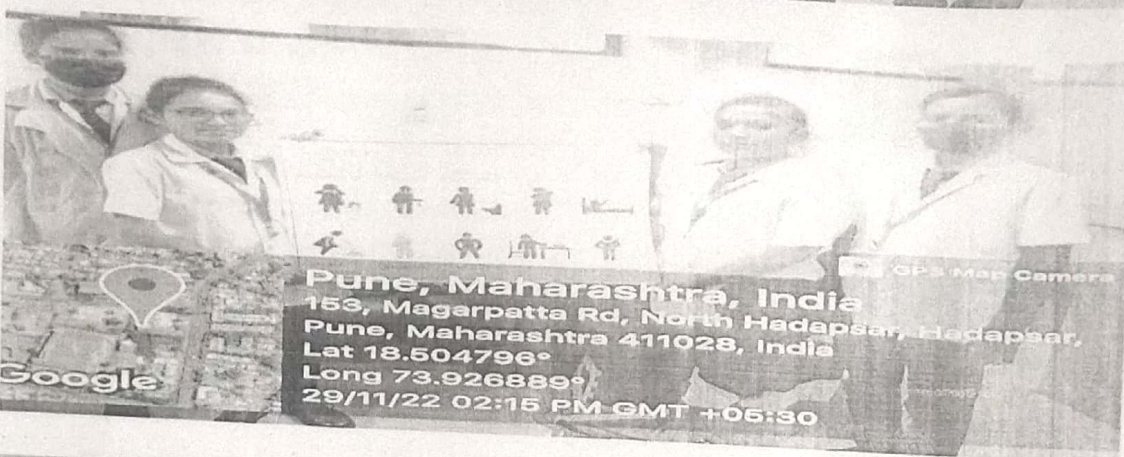

More awareness and understanding about the pancreatic cancer amongst the public, the medical community, governments, as well as the resulting investment and interest in the disease, will allow more people to be diagnosed in time for surgery – currently the only potential for a cure. So it is imperative to understand the sign & symptoms and get early diagnosis to avail appropriate treatment. World Pancreatic Cancer Day plays crucial role in encouraging people and concern medical fraternity participate in the awareness campaign to

create better opportunity for the affected one. In Nobel hospital, Institute of nursing education and research, Tilak Maharashtra Vidyapeeth conducted poster presentation we able to create awareness in people so they can know the risk factors, sign and symptoms, prevention and preventing actions for Pancreatic Cancer.

**TILAK MAHARASHTRA VIDYAPEETH,
INSTITUTE OF NURSING EDUCATION AND RESEARCH, PUNE**

Name of the event: Baby bath and care of baby on ventilator

Organizer: Nursing Department, Tilak Maharashtra Vidyapeeth.

Date and time: 26.11.2022, 2:30 pm -3:30pm

Participants: 4th year B.Sc. Nursing

Speaker: Ms. Ashwini Palwade

Topic Addressed:

- What is Baby bath
- Purposes of Baby bath
- Discuss indication and contraindication of baby bath
- Explain articles needed for baby bath
- Demonstrate baby bath
- Care of articles and baby after bath
- What is care of baby on ventilator
- Purposes of ventilator care
- Discuss articles needed for ventilator care
- Demonstrate care of baby on ventilator
- Care of articles after ventilator care

Under the guidance of Prof. Dr. Madhuri Shelke (Principal, INER, Pune), Ms. Ashwini Palwade (Clinical Instructor) took a skill station on Baby bath and care of baby on ventilator. This skill station was conducted in the nursing department with the presence of final year students of B.Sc. Nursing.

The goal of the skill station was to improve the knowledge of the students related to baby bath and care of baby on ventilator. At the beginning of the skill session, knowledge was assessed by asking various questions like:

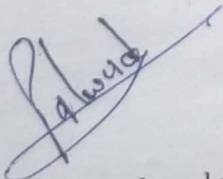

1. What are the purposes of baby bath
2. What are the contraindications of baby bath
3. What is care of baby on ventilator
4. How you can prevent ventilator associated pneumonia with the help of ventilator care

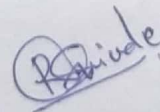

The students were curious about the skill station of baby bath and care of baby on ventilator. All necessary things were collected for the skill station. Introduction was given to students related to baby bath and ventilator care.

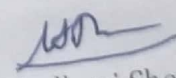

After the introductory part, discussed with students about purposes of baby bath and care of baby on ventilator and articles needed for baby bath and care of baby on ventilator. After the discussion, a skill station was given on Baby bath and care of baby on ventilator.

After the skill station, again questions were asked to the students related to baby bath and care of baby on ventilator to assess the effectiveness of the skill station. Knowledge regarding baby bath and care of baby on ventilator was improved in the session.

The session was ended with a vote of thanks by Ms. Ashwini Palwade.

Date and time: 23.11.2022 at 4 pm to 5 pm

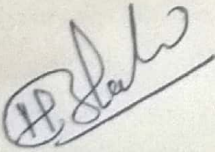

Participants: Second year BSc students.

Venue –Kai . Kashinath Anaji Dhanakwade Patil, Primary Heath Center Campus

Under the guidance of Hon'ble Vice Chancellor Dr. Dipak Tilak, Dr. Geetali Tilak, Vice President. Dr. Rohit Tilak Sir and Principal of nursing Institute Dr Madhuri Shelke The Stomach cancer day program was conducted by Second year BSc Nursing students in the community area.

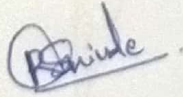

The goal of the program was to create awareness of stomach cancer in the selected community. Students have given health education and performed a role play in the PHC campus. The faculty Ms Revati Chavan and Ms Kanchan Kumbhar was supervised to students in the awareness program . Community audience got the knowledge of the stomach cancer and actively participated by asking the doubt regarding stomach cancer.

The role play was really very informative and enriching and it created awareness regarding stomach cancer. The session ended with vote of thanks given by student Ms. Leena Aware.
