World Hypertension Day 2023

NAME OF THE EVENT – Seminar on Hypertension On the occasion of World Hypertension Day.

ORGANIZER – Tilak Maharashtra Vidyapeeth Nursing Department.

DATE AND TIME – 17/05/20223 Time 12 -1 pm

PARTICIPANTS – T.Y. Basic B.Sc. Nursing Students

SPEAKER – Mrs. Shilpa Bakal

VENUE – Chaitanya Mental Health Care center, Kondhawa.

THEME – “Measure Your Blood Pressure Accurately, Control It, Live Longer”

Topic Addressed –

- Introduction to World Hypertension Day
- Reveal the theme of World Hypertension Day
- Definition of Hypertension.
- Causes and Management of Hypertension
- Long term effects of Hypertension
- Prevention of Hypertension.

Under the guidance of Dr. Madhuri Shelke (Principal INER, Pune, the third year Bsc Nursing department had conducted the seminar on Hypertension- “Measure Your Blood Pressure Accurately, Control It, Live Longer” On the occasion of World Hypertension Day.

The purpose of this activity is to highlight the importance of better prevention, detection and treatment of high blood pressure.

This year, the theme of World Hypertension Day was **Measure Your Blood Pressure Accurately, Control It, Live Longer**, focusing on combatting low awareness rates worldwide, especially in low to middle income areas, and accurate blood pressure measurement methods.

The objective of WHD is to communicate to the public the importance of hypertension and its serious medical complications, and to provide information on prevention, detection and treatment. World Hypertension Day was initiated by the World Hypertension League in 2005 to raise awareness regarding high blood pressure (BP) and its complications. The WHL launched its first WHD on May 14, 2005. Since 2006, the WHL has been dedicating May 17 of every year as WHD. The Seminar had included the subtopics like what is Hypertension, Causes of Hypertension, signs and symptoms, management, prevention of Hypertension and follow-up care.

Hypertension is 1 of India's most common CVD risk factors, affecting approximately 30% of adults. Obesity and metabolic obesity, found in as many as 50% of anthropometrically undernourished and normal-weight Indian children and adolescents, are key drivers for hypertension.

Only about 12% people with hypertension in India have their blood pressure under control. Uncontrolled blood pressure is one of the main risk factors for cardiovascular diseases (CVDs) such as heart attacks and stroke, and is responsible for one-third of total deaths in India.

Hypertension is considered as the number one contributing risk factor for global deaths, causing strokes, heart attacks, and other cardiovascular complications. The month of May is declared as the "National Awareness Month" to prevent and control this disease.

The seminar conduction had provided an opportunity to collaborate and increase awareness regarding the impact of Hypertension on individuals and communities.

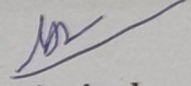

The session was very interactive along with discussion regarding the topic and resolution of their queries.

At the end of the session, the effectiveness of the seminar was assessed through the question answers and clarification of their doubts.

TILAK MAHARASHTRA VIDYAPEETH PUNE

INSTITUTE OF NURSING EDUCATION AND RESEARCH PUNE.

NAME OF THE EVENT – Seminar On “Asthma care for all” On the occasion of World Asthma Day.

ORGANIZER – Tilak Maharashtra Vidyapeeth Nursing Department.

DATE AND TIME – 11/05/20223 Time 12 -1 pm

PARTICIPANTS – T.Y. Basic B.Sc. Nursing Students

SPEAKER – Mrs. Shilpa Bakal

VENUE – Chaitanya Mental Health Care center, Kondhawa.

THEME – “Asthma care for all”

Topic Addressed –

- Introduction to World Asthma Day Celebration
- Reveal the theme of World Asthma Day
- History of Asthma
- Importance of Asthma awareness and care.
- Impact of Asthma on individuals & community.
- Advancements in asthma care.

The goal of the conduction of the seminar was to increase the awareness and encourage better management and care of Asthma on a larger scale.

The global initiative for Asthma (GINA) has designated “Asthma Care for All “as the theme for the 2023 World Asthma Day. The majority of asthma related illnesses and deaths occur in low and middle income countries. GINA urges healthcare providers to ensure that all patients have access to effective, high quality medications to reduce this burden. The asthma care for all campaign aims to promote the development and implementation of effective asthma management plans everywhere with sufficient resources.

Under the guidance of Dr. Madhuri Shelke (Principal INER, Pune, the third year Bsc Nursing department had conducted the seminar on “**Asthma care for all**” On the occasion of World Asthma Day.

The goal of conducting the programme was to create awareness among the students about the asthma, its signs and symptoms and its management.

The Seminar had included the subtopics like Causes of Asthma, signs and symptoms of asthma, management and follow-up care.

The seminar conduction had provided an opportunity to collaborate and increase awareness regarding the impact of asthma on individuals and communities. The seminar also highlighted the latest development in asthma research and treatment, providing valuable information to the students.

The session was very interactive along with discussion regarding the topic and resolution of their queries.

At the end of the session, the effectiveness of the seminar was assessed through the question answers and clarification of their doubts.
