- Aftercare of procedure on Oral Medication

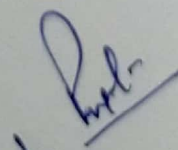

**PURPOSES OF SUBCUTANEOUS INJECTION:**

- To prevent the disease.
- To cure the disease.
- To promote health.
- To give palliative treatment.
- To give as a symptomatic treatment.

Under the guidance of Dr. Madhuri Shelke (Principal TMV, INER, Pune) I have conducted a Skill station on Oral Medication. The goal of conducting the skill station was to increase the student's knowledge and skills in performing Oral Medication.

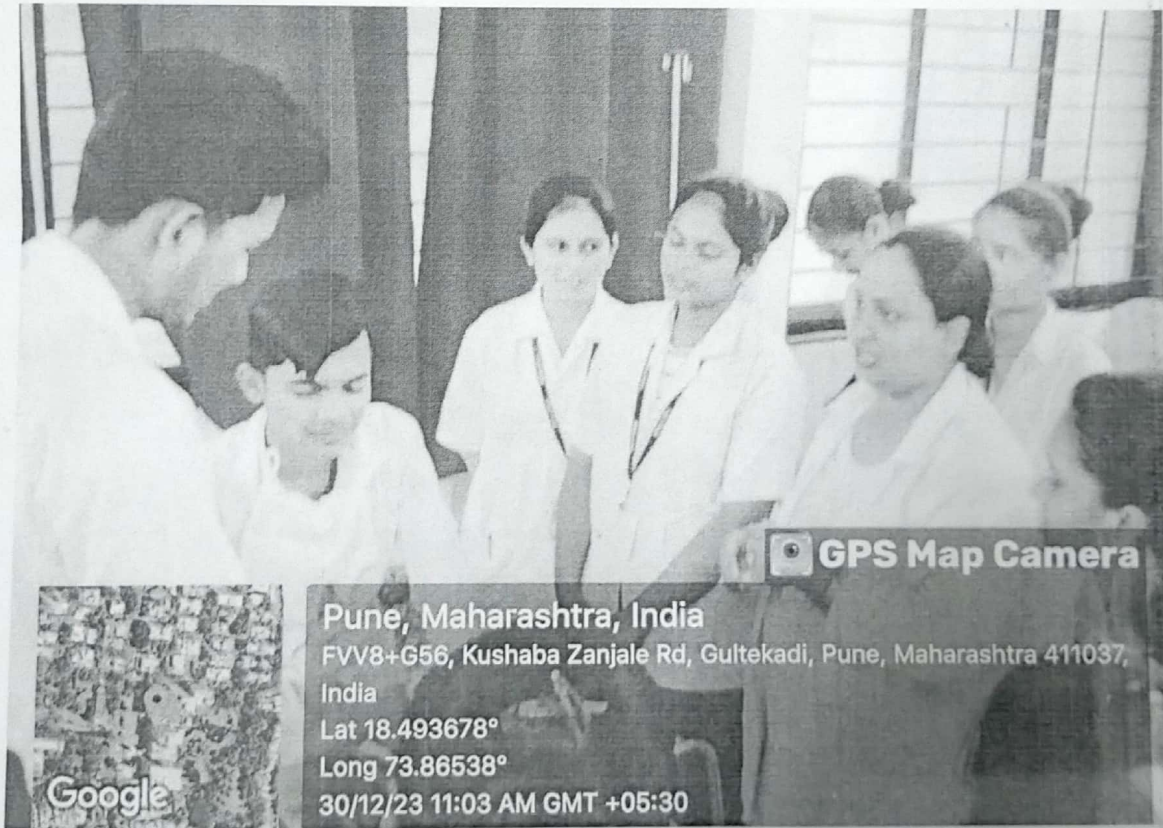

The session was very interactive along with a discussion regarding Oral Medication, I explained the before and after care of the procedure and what are the nursing responsibilities of administering Oral Medication.

At the end of the session, the effectiveness of the skill station was assessed through the question and answers and re-demonstration of Oral Medication.
